Project Proposal: Unit Match-University Roommate Finder

Problem:

Finding a compatible roommate in university sometime can be challenging and often lead to roommate conflicts affecting students' academic and personal experiences negatively. Current methods of finding roommates, through social media, or through friends lack personalized matching and verification, resulting in mismatches and discomfort.

Importance:

UnitMatch aims to streamline the process of finding roommates by providing a reliable and user-friendly platform that matches students based on compatibility factors, preferences, and lifestyle habits. By facilitating compatible roommate pairings, UnitMatch aims to create a more harmonious living environment, enhancing students' overall university experience.

Target audience:

Current university students who are seeking compatible roommates for on-campus or off-campus housing arrangements, including freshmen, transfer students, and international students.

Efficient UnitMatch:

unitMatch will help to reduce stress and anxiety when trying to find roommates in a new or current academic environment. In addition, it will enhance safety because in order to create and unitMatch account a university email or student IDs will be required for verification purposes.
